

## DESCARGA DE DATOS MODIS DE NIVEL 2, POR MEDIO DE LA HERRAMIENTA DE BÚSQUEDA "WIST" (WAREHOUSE INVENTORY SEARCH TOOL)

WIST, al igual que LAADS, es una herramienta que facilita la búsqueda y descarga de múltiples imágenes provistas por diferentes sensores remotos. En este documento, se explicaran los pasos básicos para la generación de un pedido de descargas del producto MOD09GA, del sensor MODIS/Terra.

El acceso a esta herramienta se realiza mediante el siguiente link

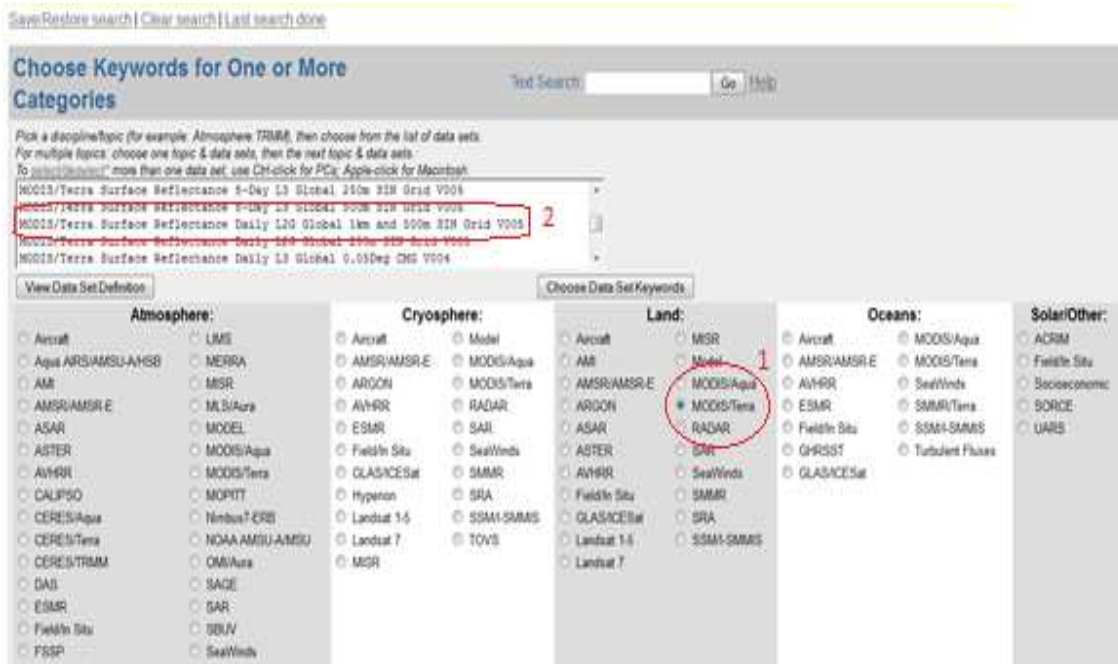

<https://wist.echo.nasa.gov/~wist/api/imswelcome/>

Ahí encontraremos la página de acceso al servidor, que solicitará un nombre de usuario y contraseña válidos para permitir el acceso a la búsqueda. En caso de no estar registrados, se deberá crear una cuenta.

The screenshot shows the WIST (Warehouse Inventory Search Tool) website. At the top, there is a NASA logo and the title "Warehouse Inventory Search Tool (WIST)" with the subtitle "Search for and order earth science data products from NASA and affiliated centers". Below this, a yellow box contains "Enter WIST" and "Data Center Status" information. The "Data Center Status" section includes alerts for ALL, LAADS, LARC, LP DAAC, and ORNL DAAC. The LAADS alert mentions an update to the MODIS algorithms with 6-hour gridded (GDAS) atmospheric temperature and moisture profiles. The LARC alert lists available sensors like CALIPSO, CERES, MISR, MOPITT, TES, SAGE III, SRB REL3.0, and ACRIM III. The LP DAAC alert provides a link to the ASTER GDS IMS Web Site. The ORNL DAAC alert mentions network outages. At the bottom of the page, there is a "Login" section with fields for "User Name:" and "Password:" and a "Login" button. There are also links for "Create Account", "Forgot your password?", and "Forgot your User Name?". A "Text Search" field with "Go" and "Help" buttons is also visible.

Después de acceder a la plataforma de búsqueda, se selecciona el producto de interés, de acuerdo a las necesidades. Para este tutorial, se trabajará con la superficie terrestre, por lo cual en **Land**, se selecciona MODIS/Terra (1), que proporciona los productos de dicho sensor, posteriormente se selecciona la opción que se ve a continuación (2), la cual contiene las 7 primeras bandas del sensor, con resoluciones espaciales de 500m y 1Km.

The screenshot shows the WIST search interface. At the top, there is a search bar with the text "Text Search" and a "Go" button. Below the search bar, the heading "Choose Keywords for One or More Categories" is displayed. Underneath, there is a list of categories: Atmosphere, Cryosphere, Land, Oceans, and Solar/Other. The "Land" category is selected, and the "MODIS/Terra" option is highlighted with a red circle and labeled "1". In the search results, the option "MODIS/Terra Surface Reflectance Daily L2G Global 1km and 500m SIN Grid V004" is highlighted with a red box and labeled "2".

La plataforma ofrece opciones para activar o desactivar las capas que se necesiten, esto con el fin de ubicar la selección espacialmente en el área definida por las coordenadas de interés, además de manejar un zoom que se ajuste al tamaño de la ventana que se defina. La hora y fecha de inicio y finalización, determinará el rango de tiempo en el que se realizará la búsqueda de los productos.

Primary Data Search | Data Granule ID Search | Local Granule ID Search

### Choose Search Area

Click & hold, then drag on the map to select a search region - or - Enter four corners in clockwise order.

**ACTIVAR O DESACTIVAR CAPAS (OPCIONAL)**

- Places
- Roads
- Rail
- Rivers
- Political

**Zoom**  
1.4x (Single click on map to pan)

**DEFINIR COORDENADAS DE LA IMAGEN**

Use WGS 84, UTM, or UTM 32N EPSG 31433 format. Click on "Update Lat/Lon Corners on Map" if you type in coordinates.

4.0000	* Lat	4.0000
-78.0000	* Lon	-78.0000
center		
3.0000	* Lat	3.0000
-78.0000	* Lon	-78.0000

Update Lat/Lon Corners on Map

Global Search | Stereographic N-pole | Type in Lat/Lon Point  
 Equatorial | Stereographic S-pole | X/Y Coordinate Range  
 Orthographic | Global granules only | Orbit Search

### Choose a Date/Time Range (not required)

Date format: YYYY-MM-DD (1967-01-25) or MM/DD/YYYY (05/25/1967)  
 Time format: HH:MM (14:30) or HH:MM:SS (14:30:01)

You may also enter a date without a time or a start date without an end date. Use the help link for information on default values.

**3 DEFINIR RANGO DE FECHA**

Start Date: 2008-07-01 Time (UTC): 00:00:01  
 End Date: 2008-09-30 Time (UTC): 23:59:58

Standard Date Range | Julian Date Range | Annually Repeating

### Choose Additional Options (not required)

- Return a maximum of 100 data granules per data set (Range: 0 - 2000).
- Only return data granules which have browse products.
- Only display collections which have browse products.
- Allow searches to run for a maximum of 90 minute(s).
- Return **DEFAULT** metadata in search results.
- Only return data granules which were retrieved during the  Day/Night.
- Name this query. (will be used in creating a file name when saving the query)

**Start Search** 4

Una vez se complete la búsqueda, se eligen las imágenes requeridas, en este caso se seleccionaron todas las imágenes, luego se escoge la opción “Add selections to cart”.

It is recommended that users do not use the back button in their browser to navigate WIST, but to use the navigation links and buttons.
